EXPERIENCE

Professional Exchange Service Corp, California — *Lead Developer*

2024 - PRESENT

- **Design and build custom websites** for clients using **WordPress, Drupal**, and **CiviCRM**, ensuring user-friendly experiences and tailored functionality.
- **Lead the development and maintenance of scripts** that enhance call center agent performance, optimizing workflows and productivity.
- **Create and manage backend services using PHP and Node.js** to support and streamline call center operations, ensuring stability, scalability, and efficiency.

Branding Brand, Remote — *Software Engineer*

2022 - 2023

- **Develop mobile applications using React Native**, crafting innovative digital solutions that elevate user experiences across iOS and Android platforms.
- **Build dynamic, high-performance web applications with Next.js**, ensuring fast, responsive, and user-friendly experiences across diverse devices and browsers.

Unwired Broadband, California — *Software Engineer*

2021 - 2022

- **Led the development of cutting-edge software solutions**, using **React** and **TypeScript** to build scalable and maintainable front-end applications.
- **Leveraged Python to create automation tools** that optimize network functionality and improve operational efficiency.

Developed by Dannon, California — *Freelance Developer*

2017 - PRESENT

- **Build custom websites and web applications** for clients using modern frameworks like **Next.js**, focusing on performance, SEO, and user experience.
- **Develop and maintain WordPress websites**, customizing themes and plugins to meet specific client requirements and business goals.
- **Create backend services and APIs using Go (Golang)**, delivering fast, efficient, and scalable solutions to support web and mobile applications.
